

A photograph of a hospital hallway. In the foreground, a nurse in blue scrubs is assisting an elderly woman in a wheelchair. The woman is smiling and looking up at the nurse. In the background, a doctor in a white coat and a nurse in a white uniform are walking away. The hallway is bright and clean, with a green exit sign visible in the distance.

BEAT

**Personally yours,** because people are different.

A photograph of a nurse in teal scrubs standing next to a patient in a white hospital gown. The nurse is holding the patient's hand and looking at her with a smile. The patient is also smiling and looking back at the nurse. They are in a hospital room, and an IV drip stand is visible in the background.

## Glossary:

**Geographic cover:** Geographical coverage describes the locations or the geographic area which is related to a case where there is no hospital that belongs to the specific Designated Service Provider (DSP) group hospital e.g. Netcare group is the DSP hospital and if there is no Netcare hospital in the region of 50km (geographic cover), then another hospital will be listed as the preferred hospital.

**Sub-acute:** Sub-acute care is provided on an inpatient basis to those individuals needing services that are more intensive than those typically received in skilled nursing facilities, but less intensive than admission in acute hospital care facilities (previously Step Down facilities). Sub-acute units tend to be housed in skilled nursing facilities or in skilled nursing units.

**General hospital:** A general hospital is a hospital that does not specialise in the treatment of particular illnesses or surgeries. They can admit for any medical condition or any type of procedure. This includes both private or state hospitals.

**Discipline cover:** Occurs when a specific hospital in the DSP hospital network cannot render a specific service. E.g. if a DSP hospital cannot cater to cardiovascular procedures/admissions, a hospital that can render the service in a 50km radius will be a preferred provider.
